

As an Administrator, I want to be able to create and delete TA accounts to account for any new or old TAs

Scenario: Admin creates a TA account successfully

GIVEN I am logged in as an Administrator

WHEN I enter a valid name, email, password, and select "TA" as role

AND I click "Create Account"

THEN the TA account is saved

AND I see a success message

AND the TA appears in the list of users

Scenario: Admin tries to create a TA account with an existing email

GIVEN a TA account already exists with the email

WHEN I enter the same email and try to create a new account

THEN I see an error message saying "Email already in use"

AND the account is not created

Scenario: Admin tries to create a TA account with missing fields

GIVEN I am on the Create Account screen

WHEN I leave the email or password field empty

AND submit the form

THEN I see invalid error messages

AND the account is not created

Scenario: Admin deletes a TA account

GIVEN the TA exists in the system

WHEN I click "Delete" next to their name and confirm
THEN the TA account is removed
AND their section/course assignments are cleared

Scenario: Admin attempts to delete a non-existent TA

GIVEN no TA exists with the specified ID
WHEN I attempt to delete that TA
THEN I see an error message saying "TA not found"
